Foreword

Remembering Luigi Padeletti

Ranjan K. Thakur, MD, MPH, MBA, FHRS Andrea Natale, MD, FACC, FHRS
Consulting Editors

We introduce this issue of *Cardiac Electrophysiology Clinics* by expressing our sorrow and paying tribute to an editor, Dr Luigi Padeletti. Dr Padeletti was in the process of editing the current issue when he passed away unexpectedly. We are grateful to his coeditors, Drs Bagliani and De Ponti, who completed what Dr Padeletti could not. Dr Padeletti had been an ardent supporter of the *Cardiac Electrophysiology Clinics*, having contributed several articles and having edited multiple issues over the years.

Dr Padeletti inspired and edited two recent issues of *Cardiac Electrophysiology Clinics*; the first issue focused on basic electrocardiography in normal and diseased hearts. That issue took a unique approach to discussing electrocardiography of arrhythmias. It first detailed what can be learned about physiology, pathology, and neural control from each wave and interval of the electrocardiogram and then built on that to discuss arrhythmias originating in each cardiac structure. This companion issue of the *Cardiac Electrophysiology Clinics* focuses on electrocardiography of various arrhythmias:

bradycardias, tachycardias, and some specific arrhythmias.

We and the coeditors of this issue are grateful to have known and worked with Dr Padeletti and draw inspiration from his example of dedication to scholarship. We hope the readers will enjoy reading and learning from this issue, because that will be the most fitting tribute to his memory.
